

From May 17 to 19, 2024, Data for Progress conducted a survey of 1,213 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,213 unless otherwise specified.

[1] How concerned or not concerned are you about climate change?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	18 to 34	35 to 59	60+	No College	College	Black or African American	White	Latino

[10] Recently, lawmakers created a new national public service program. Members of the program will be paid to spend one year working on conservation, sustainability, public works, green infrastructure projects, and other related efforts. This program will hire **20,000** Americans over its first year. Some of the benefits of the program will include:

- On-the-job training opportunities
- Assistance paying for school or student loans
- Pathways into civil service and clean energy jobs

Do you support or oppose the new national public service program? (N=610)

[12] Which of the following statements best describes your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	18 to 34	35 to 59	60+	No College	College	Black or African American	White	Latino
Just like the Civilian Conservation Corps put thousands of young people to work during the Great Depression, our national public service organizations can fill the urgent need to address climate change and pollution now, while giving young people the opportunity to serve local communities.	53	71	52	36	57	49	56	52	53	49	62	53	52	51
Our national public service organizations should not focus on addressing climate change when our local communities already face so many other immediate challenges, like underfunded education systems, that could benefit more from young people working in public service.	35	20	35	51	30	41	35	33	38	38	30	30	37	42
